

# Does your child suffer from depression?

Pedia Research is conducting a clinical research study for children ages 12-17 who suffer from depression.

Participants may receive  
At no cost:

- Study related physician exams and lab work
- Investigational medication
- Compensation for time and travel

Symptoms of adolescent depression may include:

- Decrease interest in activities
- Change in eating habits
- Persistent boredom or low energy
- Increased irritability
- Frequent complaints of physical illness
- Low self esteem

To see if your child qualifies,  
please call
